Defensive Medication

Investigation is as necessary for the protes-

tion of the human body against disease when unhealthy induences are abroad, as iron armor and granite casements are for the protection of ships and fortresses when assailed by shot and shell .-Hence, it is desirable when those potent enemies of vitality, damp and cold, pervade the air we breathe, to put the system in the best possible condition to encounter them. The stomsch is the organ by which every other organ is nourished and sustained, and therefore upon its vigorous and regular action depends, in a great measure, the capacity of the system to resist the assaults of the invisible enemies of health and life, by which, at this inclement season, it is surrounded. Hostetter's Stomach Bitters, an admirable tonic and regulating medicine for all seasons, is never more needed than in winter, Gusno, the Poudrette in one row and the Guano | when the torpifying influence of a chilly atmosphere affects all the vital functions, and renders the body extremely susceptible. By toning the digestive organs, and the liver, and the bowels with this unequalled vegetable specific, a physical condition is attained which seems to be proof against all varieties of temperature, and that is inimical in the air of winter. Defensive medication is a precaution which should never be neglected when danger is present, and therefore a course of the Bitters at this season is particularly desirable, especially for the feeble and sickly. As a remedy for biliousness, dyspepsia, nervousness, and bowel complaints, there is nothing

lowed to have won for itself a reputation uneurpassed in the history of medical preparations. Its instantaneous effect in the eradication and extinction of Pain in all its various forms incident to the human family, and the unsolicited written and verbal testimony of the masses in ts favor, have been, and are its own best advertisements. The ingredients of the PAIN KILLER, being purely Vegetable, render it a perfectly safe and

This Medicine, justly celebrated for the cure of so many of the afflictions incident to the human family, has now been before the public over THIRTY YEARS, and has found its way into almost every corner of the world; and wherever it has been used, the same opinion is expressed of its medical properties.
